No. 1,913.—[REGISTERED AT THE
G.P.O. AS A NEWSPAPER.]

LONDON, SUNDAY, JUNE 9, 1918.

THREE HALFPENCE

SERIES OF SUCCESS BY ALLIED TROOPS

SITUATION TO-DAY.

ALLIES' SUCCESSES.

While no important change has taken place on the battle front, French, British and American troops holding the flanks of the big salient have gained conspicuous successes and have materially improved the position of the Allied armies.

Five villages have been recaptured, and, most important of all, the French have regained Hill 204, immediately to the west of Chateau-Thierry. This dominates the road to Paris, and it will give the Allies a valuable local advantage when the Germans resume their attack in force.

Franco-American Success.

In the small salient, with its point at Veully la Poterie, where the Germans have come nearest to Paris, more ground was wrested from them. French and American troops fight side by side here. They have retaken Vinly and La Poterie, and have generally bettered their positions on the Torcy-Bouresches front.

Immediate Danger Over.

A high military authority says: It may be stated with confidence that the enemy's progress on the Western front has been for the time being checked. The immediate danger which existed a week ago is over, though the general situation cannot be said to give less cause for anxiety.

Defences Strengthened.

The French defences have been greatly strengthened. The Germans are showing great hesitation in attacking Rheims. The French have prepared the defences very thoroughly, and a direct assault could only be followed by very heavy losses to the enemy. The Germans are endeavouring to work round the town from both flanks.

Rupprecht's Reserves.

The Army Group of Crown Prince Rupprecht has still a very formidable force of reserve troops, and till we know where and when these troops will be thrown in the anxiety will continue. The Germans are quite free to concentrate either on an attack on Paris or on an advance on Amiens.

Allies' Disadvantages.

The Allies labour under certain disadvantages. The enemy advance has resulted in a considerable extension of the line, which to the numerically weaker side is decidedly disadvantageous.

The Allies have also a large number of vulnerable points—among them Paris, Amiens, and the Channel ports—to protect. We are unable to keep a large reserve concentrated to meet any emergency.

The Allies have been driven so far back that there is little room left to manoeuvre. We have to fight where we stand.

Austria to Strike.

As regards the Italian front we must expect the Austrians very shortly to take the offensive. It is unlikely that the Germans will allow their ally to remain inactive any longer, and there is no excuse for his doing so now that the Piave has ceased to present any formidable obstacle to an Austrian advance, as it is rapidly subsiding after the melting of the snows. The Italians have a more favourable line than on the Isonzo and the efficiency of the Italian Army has increased enormously, consequently we may await with confidence the Austrian attack. There are no German troops at all on the front at present.

FRENCH STILL PROGRESSING.

Advance South-East of Ambleny and at Veully La Poterie.

TWO VIOLENT ENEMY ATTACKS SMASHED.

The French official communiqué yesterday afternoon stated:—On the front south of the Aisne there was fairly great artillery activity, particularly in the region of Faverolles. South-east of Ambleny we improved our position during the night. South of the Ourcq our troops, continuing their pressure, realised fresh progress. We carried forward our lines as far as the western approaches of Dammard to the east of Chezy, and more than a kilometre to the north of Veully la Poterie. We made 50 prisoners. Further to the south the enemy violently attacked on two occasions our positions on the front Bouresches—Le Thillot. We broke the assaults of the enemy, who sustained heavy losses without obtaining any advantage.

On the rest of the front the night was relatively calm.

FIVE VILLAGES RETAKEN.

Franco-American Success.

The French official communiqué on Friday morning announced the capture of the villages of Vinly, Les Bouquelles, and Le Port, and the evening report stated:—Between the Ourcq and the Marne we have successfully continued our operations of detail. Franco-American troops extended their gains to the north of Vinly as far as the eastern borders of Chezy, captured Veully La Poterie and Bouresches, and in general very appreciably improved their positions on the front from Torcy to Bouresches and between the Marne and Rheims. The action continued against Bligny and completely restored to us the village. The number of prisoners made during the day exceeds 200.

BRITISH OFFICIAL.

A SUCCESSFUL RAID.

Sir D. Haig reported yesterday morning as follows:—We captured a few prisoners last night in a successful raid in the neighbourhood of Hulluch. Our patrols inflicted casualties on the enemy in the Strazeele sector and captured a machine-gun. Hostile artillery has been active north of Albert and south-east of Arras.

AMERICAN OFFICIAL.

ADVANCE OF A MILE.

In an attack north-west of Chateau-Thierry our troops, in conjunction with the French, advanced our lines south of Torcy a mile, capturing prisoners and inflicting heavy losses in killed and wounded. There was lively artillery fighting in Lorraine. Our batteries executed effective reprisals and neutralised fire.

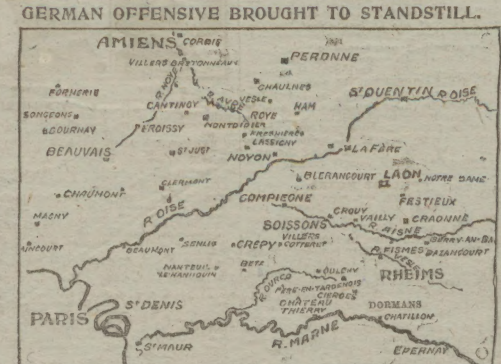

THE NEXT BLOW.

FRESH FRENCH RESERVES. Paris, Saturday.—M. Maurice Barrès writes in the "Echo de Paris":—"Although the enemy still has a further 40 divisions at his disposal our civil and military authorities are forming new reserves without encroaching on the supply from overseas—the hundreds of thousands of soldiers from America who, brigaded with our soldiers, are guarding the trenches and liberating an increasing number of seasoned troops for the front. Thus we are splendidly backed by our Allies—America, Britain and Italy. All the Allied nations realise the serious import of the battle now in progress which our enemies in their need and their haste to finish the war are absolutely determined to make decisive.—Reuter.

AUSTRIA'S CRACK FLIER.

Lt. Baron Barthold, Austria's ace, who was seriously wounded while piloting an Italian aviator over Trieste, is being nursed in a hospital at Trieste. His condition is said to be hopeless.

GERMAN OFFENSIVE BROUGHT TO STANDSTILL.

All the efforts of the Germans to establish themselves on the South of the Marne have failed, the Americans showing great advantage at Chateau Thierry. There they have the enemy in splendid style. The Hunn have made no further attack on Rheims; and their advance on Paris has at present been brought to a standstill.

MYSTERY OF THE LOST SHIP.

WAS IT A TORPEDO?

Sir Geo. Cave and the other British delegates to the Prisoners of War Conference have reached Rotterdam safely on the Sindo, but the tragic story told by those rescued from the North Sea. Fortunately the Sindo was not, as was at first reported, on board a second hospital ship (which sailed together) shows how narrowly the delegates escaped the perils of the North Sea. The Sindo's captain stated that the vessel was hit by a mine, not, as was at first reported, on board the mined vessel, which carried no passengers, although they, with most of the others on board the Sindo, were witnesses of the accident. The Sindo was about 500 yards behind the Sindo when, at 8 minutes past 1 in the morning, shots on board the latter heard a terrific crash. The Sindo's captain stated that he immediately swung his vessel round, for the Konigin Regentes had been struck right amidships, and broke up and sank in 4 to 6 minutes. Fortunately the weather was fine and the sea smooth, but when the crew were picked up it was found that 4 stokers were missing, whilst of the seven injured the purser died on board the Sindo. Whilst one or two of the crew of the Konigin Regentes are said to have thought they were without incident, the nature of the case, no material evidence as to the cause of the accident.

Captain's Statement.

The captain of the Sindo said that the ship was undoubtedly hit by a mine, and that the mine was in the nature of the case, no material evidence as to the cause of the accident. The captain of the Sindo said that the ship was undoubtedly hit by a mine, and that the mine was in the nature of the case, no material evidence as to the cause of the accident. The captain of the Sindo said that the ship was undoubtedly hit by a mine, and that the mine was in the nature of the case, no material evidence as to the cause of the accident.

HEARD EXPLOSION.

WHAT SIR GEORGE CAVE SAW. Interviewed before his departure from Rotterdam for the Hague, Sir Geo. Cave paid a tribute to the smartness shown by the Dutch crews during the sinking of the Konigin Regentes, and said the British Delegates had been very much impressed by the gallantry of the Dutch crew. He said that from both vessels boats were launched with admirable expedition. He was not prepared to say anything regarding the story that the vessel was torpedoed.

No Peace Mission.

He preferred to reserve any statement on the mission's objects until after they had met the German negotiators. On his attention being drawn to the article in the "Vossische Zeitung" suggesting that the Home Secretary had been selected in order to take up for the peace mission in connection with the Emperor Charles's peace offer, he quickly dismissed any such idea regarding the meaning of his appointment, and said they had, of course, solely come for the purpose of negotiating about an exchange of prisoners of war. Lord Newton endorsed Sir George's praise for the gallantry of the Dutch crew, and also said he preferred to make no statement at the present stage.

Was it a Torpedo?

The "Nieuwe Rotterdamse Courant" says that the ship's carpenter of the Konigin Regentes, G. Bann, stated that while he was on deck he suddenly saw an object approaching the vessel at great speed on the port side. He took this object for a big fish, and called out to the sailors to sail near him to it. When it reached the vessel a terrific explosion immediately followed. The carpenter added that he did not see a submarine.

IRISH PACKET SUNK.

Torpedoed in Daylight. The Cork Steam Packet Co. vessel Innishmaddy (about 1,000 tons), was torpedoed in broad daylight by a German submarine on May 23. She was on a voyage with a general cargo and carried 1 passenger, a soldier returning to his home, who had been taken to have been drowned. Her crew numbered 32, of whom 10 are missing. The survivors were picked up and landed at Dublin.

UNITY AND RESOLUTION.

PREMIER ON THE PRICE OF VICTORY.

Mr. Lloyd George, replying to the toast of "Success to the Allied Arms" at the dinner of the Printers' Pension Association, proposed by Sir R. Baden-Powell, said the present generation of Britishers had made unsurpassed sacrifices along with our Allies for a great purpose and an high ideal. One of the most encouraging things was the superb valour and the trained skill with which the Americans had taken their part in the struggle and defeated the foe. It was most encouraging, because they were coming in steadily; there was a great flow, and we were depending upon them. The fact that we knew when they appeared in the battle line they would fight in a manner worthy of their great country and its great traditions was a source of support, tolerance, and encouragement to those who, with anxious hearts, were watching the struggle. If for any cause the Allies were not to succeed it would be a sorry world to live in.

Fate of the World in the Balance.

At most times people were inclined to exaggerate the events of the day, and there were occasions when generations of men under-estimated the significance of events. It was impossible to exaggerate the importance of the significance of the issues with which we were confronted to-day. The fate of the world, the destinies of men, and the lives of generations would be fashioned by the failure or triumph of our cause. The struggle to-day was against an ideal more material, more sordid and more brutal than any which had yet been sought to impose upon Europe. There was contempt for human life, for right, contempt for humanity, and if it was to succeed it would fling back civilisation into the darkest dungeons of the past. (Cheers.) We were paying a big price for victory, a sad price, but it would not equal in value what we were defending to-day. We were passing through anxious days, and the crisis was not passed, but with stout hearts we should win through. (Cheers.)

Woe to the Plague.

And then we to the plague. (Cheers.) In the interests of civilisation and the human race, it must be stamped out. (Cheers.) It could not be allowed again to darken the lives of millions, and to isolate the home of millions. (Cheers.) We had to have our hammer blows. Hammer blows would crush poor metal, but they hardened and consolidated good metal. (Cheers.) We would do more than that on British hearts which had stood the test of centuries, and would stand this test. So would the gallant and the great people of France. (Cheers.) It had united France more than ever. Unity and resolution were what we needed at this moment. We had one purpose. Until we had stemmed the torrent let us be one people, one in aim and resolution, in courage and resolve. Let us be one people, one in aim and resolution, in courage and resolve. Let us be one people, one in aim and resolution, in courage and resolve.

GRAVESEND ELECTION.

COALITION CANDIDATE WINS. Polling to fill the vacancy caused by the death of Sir G. Parker (U.) resulted as follows:—Mr. A. Richardson (U.) 1,312. Mr. E. D. Hinkley (Lab.) 1,138. Coalition maj. 174.

NO PEACE TALK.

Amsterdam, Saturday.—In the course of an interview with a representative of the "British News" Sir Geo. Cave said with reference to the suggestion made by the "Vossische Zeitung" that peace negotiations might be discussed, that the conference was not the proper time for discussing to prisoners of war.—Reuter.

FIRE EPIDEMIC.

Two major fires occurred at the premises of Messrs. Clarke, Nicholls and Coombs (Ltd.) at Hackney Wick, on Friday, though neither was serious. It was only a few days ago that the premises of the same firm were destroyed by fire. Last night 2 sheds were damaged, the one used as a store and the other used as a stable and store and the other used as a stable and store and the other used as a stable and store.

WOMEN TEACHERS PAY.

A meeting of training college women students, secondary and elementary will be held at the Memorial Hall on June 22 to protest against the low commencing salary for women teachers. The Board of Education, and to insist upon a minimum of £120 a year, with annual increments of £10. The students assert that it is impossible for women teachers to accept less with prices at their present high level.

Cycling peer Crawley Miss Austen-Smith, of Horley, collided with a traction engine and was killed.

U-BOATS WILL NEVER STARVE US OUT

MR. CLYNES' OPTIMISTIC REVIEW OF THE FOOD POSITION.

"The prospects of increased supplies all round are far better than in 1917," said Mr. Clynnes in an optimistic review of the food position and the work of the Food Ministry in the Commons. He promised white and better bread and more meat, but announced an increase in the price of milk till the end of December. Mr. Clynnes told "the German submarine murderers" that, however many ships they sink, they will not starve out the British. Proceeding, he said: Our cold storage capacity has increased from 32,000,000 to 35,000,000 cubic feet, and by the end of this year our cold storage space will have been increased by more than 25 per cent. of our pre-war capacity. There are now in existence 700 national food kitchens. "It is probable," said Mr. Clynnes, "that we shall never be reduced to any condition of either shortage or confusion such as prevailed before the end of last year."

The Kaiser's Boasts.

It was about that time that the Kaiser delivered a special address to an assembled multitude of his submarine murderers and urged them to persevere in their task of destruction. He claimed that their sacrifices for which we should be eternally grateful, would soon place us at their mercy. "If he has not by this time felt the folly of that speech his men must now know that not only has their power of mischief been immensely reduced, but there is absolutely no hope of that wicked instrument of modern war, even when used in the most callous and inhuman way, being able to bring about a decisive victory for the enemy." Mr. Clynnes said he was satisfied that should the job be well handled, and State control prove to be a public benefit, a strong public demand would grow in favour of maintaining State control after the war.

Milk to be Deared to-morrow.

Mr. Clynnes summed up the position with regard to the chief articles of food as follows:—

MEAT. The outlook regarding home supplies is much improved, and we are now at the top of the curve with regard to frozen meat. The Ministry has had to increase the required number of beasts to be killed in 14,000 slaughterhouses, and, in addition, has had to increase the number of beasts to be killed in 14,000 slaughterhouses, and, in addition, has had to increase the number of beasts to be killed in 14,000 slaughterhouses.

BREAD.

We have had a substantial commitment from America, having received 457,000 tons of wheat. It is intended to issue an order putting retail prices on a definite footing. The best oats will be available at 4d. per bushel. In view of the fact that we have to pay and the labour involved, it will be necessary to reduce prices generally, but not to the extent of a serious loss.

BETTER BREAD.

It is necessary to maintain the subsidy to bakers, in order to prevent the cost of bread rising. We have still not received advances in wages equal to increased cost of necessities. Good harvests are expected, but not necessarily here in America and Canada, and it is hoped that the quality and quantity of bread will be substantially improved.

MORE POTATOES.

The subsidy was estimated to cost £5,000,000 a year, but it will not exceed £2,500,000. It has brought under cultivation 100,000 additional acres in Britain and 200,000 additional acres in Ireland, and the crop has been increased by 2,000,000 tons.

DEARER MILK.

From Monday until the end of December the farmer will be allowed 4d. a gallon more for milk. This increase, which is justified by the cost of production, will add 1d. a quart to the retail price. The effective control of the wholesale distribution of milk has become a national necessity, and measures are being taken to that end. We must look more and more to the local authorities to supervise and improve milk distribution, and to see especially that women and children are given their required quantities.

FISH.

The control of fish supplies has presented immense difficulties, and the Government are assigned to encourage fish production and to afford good pay for men who have unusual risks to face in the fishery. The price of fish is still high, though some reduction has recently been effected without diminishing the supply.

JAM.

Practically the whole of this year's fruit crop must be reserved for the jam manufacturers. The whole of the 1917 bitter orange crop of both Spain and Italy will be available for jam. The price of jam is still high, though some reduction has recently been effected without diminishing the supply.

MARGARINE.

The manufacture has increased fourfold, and we are now independent of foreign imports. In the course of the discussion which followed Sir C. Bathurst, chairman of the Sugar Commission, stated that the Government were now in a position to supply the country with a month's supplies. The fruit crop will be far less satisfactory than had been anticipated. The autumn crop of fruit will be very poor—very few pears, possibly no pears, and not an average crop of apples. The soft fruit crop promises to be more abundant, but strawberries, gooseberries, and currants will not be up to the mark. It is proposed, therefore, that the issue of sugar intended for the autumn hard fruits shall be issued in July so that it may be available for the later soft fruit. Mr. Clynnes, in reply to the debate, appealed to the public to work on the land in the holidays.

Butter to be Rationed.

The Food Controller has decided that butter is to be rationed, and that the rationing of butter and margarine shall be compulsory in every district. This will not apply to London and the Home Counties, where butter and margarine is already rationed, the amount being increased by 10z. to 50z. per week. The rationing of butter and margarine is now allowed an extra ration of butter each week and children each fortnight in exchange for the meat card. In the same way Jews will be able to get extra butter with their bacon coupons. 20z. of Lard Weekly. Lard is to be rationed as from July 13, the allowance being probably 20z. per head per week. Meat in Ireland. By an Order by the Food Controller the export of meat from Ireland after July 13, except under licence, is prohibited. Sugar for Jam. Applicants for sugar for preserving home-grown fruit have less than they expected when they applied for sugar, should also follow in answering these questions. The general principle to be followed is that occasional supplies which do not constitute a permanent part of the supply, and whether they commonly occur in either of these ways. The Ministry have received a number of inquiries from individuals as to the quantity of sugar to be allowed in answering these questions. [illegible][illegible]

Dr. A. J. Nation, second son of Mr. F. C. Nation, treasurer of the Alhambra, has been attacked at Reading suffering from nerve trouble. Dr. Nation's eldest son, who holds a medical diploma from London University, recently passed, said he now back with his wife, Emily Fawn, one of the best of our mid-time comedians. We may say that the nation family are well known hereabouts, celebrated his birthday on Monday last. He was born in 1860, and graduated M.D. at the University of Edinburgh Music Hall, situated in the High-street, that Parish, in 1866. He is at present residing in London as an amateur agriculturist at Puzley.

American troops, now in England, will be sent to France, where they will appear at the Palladium Sunday Concert, June 23, in aid of the funds of the George V. Memorial Hospital, under the patronage of Lord Clarendon, Sir Joseph Chamberlain, Ivor Foster, Sir Lewis Lloyd and Lily Fairclay.

The will of Archdeacon Sinclair, the fourth page of which was missing, was submitted to the Court yesterday afternoon by counsel pronounced in favour of the 3 existing sheets of paper.

OVER FIFTY YEARS' SUCCESS.

rd, Kingsbridge, Devon.

3 months' exemption.

the Pemberton Billing case at the trial, terminated in a verdict not guilty. The trial ending with this result is unparalleled in the history of the Central Criminal Court. Mr. M.P., had been charged with using obscene labels concerning Miss Allington the dancer, in regard to "obscene" and also with publishing obscene libel. His defence was a performance for the Independent Theatre, with which Mr. J. T. Bennett was identified, was calculated to cost him the first £7,000. It was contended that the Germans were guilty of misconduct by supplying British people which enables them to blackmail persons in high positions. He pleaded not guilty to any obscenity and also justified the libel as not guilty on the first charge. The defence was also accepted in the other alleged criminal libel of Mr. Bennett. The whole case was thus disposed of.

Verdict of "Not Guilty."
The jury took 1½ hours to consider the verdict. Instantly when the

JEMIMA'S ADVENTURES.

A cause of trouble for 4 years to her parents, a young woman named Jemima Hill was at Derby convicted of defrauding the Midland Railway Co. She had accompanied 2 soldiers to Leicester, where they left her, and she then returned to Derby without paying her fare, having gained access to the closed station at Leicester by climbing a fence and walking along the line. Sister Rose, court missionary, said prisoner was incapable of

making care of herself. She undertook to enter the workhouse pending her admission to a home.

PUNISHED FOR WASTING FOOD.

What Everybody Should Remember. Plenty of food is wasted without anyone being fined. You waste food if you call it and get no benefit. And you will be punished. Your stomach will punish you. The food which you do not digest will ferment and give you pains. You will be weakened, becoming underfed—however much you eat. Your appetite will be poor, and if you are hungry, it will not be a healthy hunger, but an unnatural craving caused by an irritable stomach.

To get strength and nourishment out of food, your blood must be pure and rich. Healthy blood carries nourishment from food and carries it to feed the muscles and nerves. That is why people who take Dr. Williams' Pink Pills for pale people always notice an improved and natural appetite after a few days. Their blood is being purified and the pills are used and normal health is restored. Go to your chemist for these pills. Be careful to say you want Dr. Williams' pink pills—and you will get them doing you good.

Dr. Williams' Pink Pills will benefit your health in contained in "What to Eat and How"—free if you will send a post-card to London, England, to Dr. J. C. Williams, Ltd., 100, E.O.L. (Advt.)

THE CRYING BABY

If your baby is not getting on, not gaining in weight, is troubled with indigestion or Constipation, always crying, try Savory & Moore's Food, and you will be surprised what an immense difference a day or two's feeding on this excellent food will make. It supplies just the nourishment baby needs, in an easily digestible form, and infants thrive on it even when they can take nothing else.

If you will fill in the coupon below and send it with 4d. in stamps for postage, a free sample of the Food will be sent with full directions.

COUPON To Savory & Moore, Ltd., Chemists to the King, New Bond St., London. Please send me the following sample of your Food. I enclose 4d. for postage.

F. H. L.-You might write to Dr. Adna R. Silliman, Secretary of Reconstruction, 5 Green Aisle, Gate Bldg., Westminister, 8 W.V.I., or to the Scientific and Industrial Dept., 15, Great George St., S.W. 1. The latter seems to be correct department to deal with.

CARDS.

BRIARLEY.-Sorry we cannot tell you. The participant suspended. X. Y. Z.-Your friend had properly advised you.
